CAREER OBJECTIVE

Motivated and detail-oriented Computer Science graduate with a strong foundation in Python programming, software development, and problem-solving. Eager to begin my career as a Custom Software Engineer at Accenture, where I can apply my technical skills to design, develop, and enhance scalable software solutions. Passionate about learning modern frameworks, collaborating in agile teams, and contributing to high-quality applications while continuously expanding my knowledge and delivering value to the organization.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Vishnu Institute of Technology, Bhimavaram

CGPA: 8.94/10
2021 - 2025

PROJECT

Crop Recommendation System

Technologies: Python, Machine Learning, LSTM, ARIMA, Decision Tree, Visual Crossing API

- Developed an intelligent crop recommendation system by integrating weather forecasting with soil analysis to recommend suitable crop.
- Built and compared **ARIMA** and **LSTM** models for weather prediction, selecting the best-performing model based on **RMSE**.
- Implemented a **Decision Tree** model to recommend crops using soil nutrients, temperature, humidity, rainfall, and pH values.
- Integrated real-time weather data from the **Visual Crossing API** to provide location-based crop recommendations.
- Performed data preprocessing, including handling missing values, data cleaning, normalization, and feature preparation for model training.
- Combined weather forecasting and crop recommendation models into a single end-to-end intelligent recommendation system.
- Developed a user-friendly interface that allows users to input soil and environmental parameters and receive instant crop recommendations.
- Built a scalable and efficient solution to support data-driven decision-making for precision agriculture.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java (Basics)
- **Frontend Languages:** HTML, CSS, JavaScript (Basics)
- **Database:** SQL
- **Banking & Financial Products:** Basic understanding of banking products and financial solutions
- **Customer Relationship Management:** Willingness to learn CRM practices and understand customer needs
- **Tools & Platforms:** Git, GitHub, Visual Studio Code, MS Word, MS Excel

SOFT SKILLS

- Problem Solving
- Time Management
- Communication
- Teamwork
- Quick Learner

CERTIFICATES

- NPTEL Certification – Programming in Data Structures Through Java
- Full Stack Web Application Course Completion
- Salesforce Superbadge certification
